

The Elder-Scrolls Online

The elder scrolls online is an amazing way to help Bethesda grab new players with the addition of PvP and Co-op to their early beta stage Game.

Who doesn't like decapitating their friends in a full on blood-thirsty and pixelated battle to the death? Well with the new PvP in the elder scrolls series, that is one of the things you can do. During the character creation stage of your online career, there is a full selection of perks, skills, looks and most importantly factions. There are 3 different factions and in each there are 3 different races. Every race is a slightly adapted version of the ones from the last games.

Each faction has a starting area where you complete quests. When you have finally completed all of these quests, you can go and complete the quests from another faction.

Overall, this is an action-packed adventure with amazing character creation options with epic scenes and stupendous quest design.
